

Geography Knowledge Map

Our curriculum is focused on learning the interaction between human and physical geography through locational awareness.

How has the physical and human geography of the continent impacted the development?

How does a development of a country impact the quality of life?
Are low income countries at a greater risk of natural hazards?

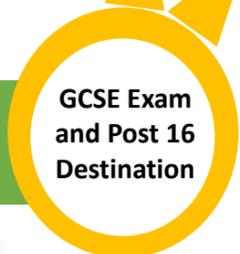

Are low income countries at a greater risk of natural hazards?

Pre-release material is received in the March of Year 11

Students will need to be able to interpret the information in the booklet

Students will be examined on the content and be asked to make a decision

Natural Hazards

How can people respond to natural hazards?

Climate Change – what causes it, the impacts and responses
Extreme weather in the UK – how the UK can deal with it
Weather Hazards – how they are formed, impacts and responses
Tectonic Hazards – how they are formed, their impacts and responses

How can nature impact people?

Issue Evaluation

The issue evaluation will be based on a GCSE topic that has been studied.

Fieldtrip to the Lickey Hills Country Park

UK's development as a post-industrial economy

Nigeria's growth to become Africa's biggest economy

Physical Fieldwork

What physical and human factors make up the ecosystem at the Lickey Hills?

What impacts the development of country?

Changing Economic World

Causes, effects and responses for the development gap

Resource Management

Distribution of global resources – food energy and water

Management of resources in the UK

Water resources globally – impacts and responses

Fieldtrip to Brindley Place - Birmingham

Coastal processes

Managing erosion through soft and hard engineering

Creation of landforms through coastal processes

Coasts

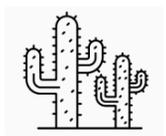

How do natural processes shape the coastline?

Urban Issues in Birmingham

How does development impact urban areas in HICs?

Change in the function from industrial to post-industrial
Opportunities and challenges in Birmingham
Problems and solutions in urban areas

Hot Deserts

What is the ecosystem like in extreme environments?

Challenges for Asia and the impact on other parts of the world

YEAR 8

Asia

Human and physical features of Asia

Reducing population growth in Asia

Oceania

How does the physical geography impact way of life?

The impact of climate change on the people of Oceania

Impact of being NEEs

Economic development of Brazil

Impacts of being LICs on quality of life

Africa

How has South America been impacted by globalisation?

How has Africa's history shaped its present? How can its geography shape its future?

Factors impacting economic development

Economic development of Africa

Europe

Causes and impacts of migration to Europe

Physical Landscapes in the UK

UK's connections with the rest of the world

Rivers

How does the river change as you move downstream?

Managing flooding through soft and hard engineering

Creation of landforms through river processes

River Processes

Urban Issues in Rio de Janeiro

How does development impact urban areas in NEEs?

What is the ecosystem like in extreme environments?

Ecosystems and Tropical Rainforests

Adaptations of plants and animals
Climate of the tropical rainforest

Urbanisation

Problems and solutions of urbanisation

Causes and management of deforestation

Adaptations of plants and animals

Climate of the tropical rainforest

North America

How prepared are North America for natural hazards?

Our World and Shirley

Local study on Shirley

Why has Shirley changed over time?

Interpreting maps

How has Shirley changed over time?
